

Message from the Vice Chancellor

I am delighted that Kalinga University is publishing an International Journal of Engineering and Extended Technologies Research (EISSN NO – 2322 – 0163). The subject of the Journal has much relevance in the contemporary scenario pertaining to the research being conducted in various fields.

There is a great reason to be buoyant as the research papers in this journal are products of the great minds of our very own institution. I have a reason to be confident that these papers will provide significant insight to the works of present subjects being discussed in world forums and researched on.

I take this opportunity to commend the authors of the papers and reinstate my faith in them, so that all intellectual deliberations from within the researchers of our institution will surely see much action in the wake of the words and findings published.

Dr. R. Shridhar

Vice Chancellor,
Kalinga University
