

Message from the Chairman

It is a matter of honor and immense pleasure that destiny has given me an opportunity to lead Kalinga University. Higher education in India, has readily adapted to the global demands and every institution has geared up to meet the global challenges by harnessing the latest technologies in education. Kalinga University has also taken a move in promoting inter-disciplinary studies and research. At Kalinga University, research, consultancy and innovation are regarded as the pillars of success. Most of the faculty members of the university are involved in research. The university has taken one step ahead in this endeavor and started an **International Journal of Engineering & Extended Technologies Research**. I firmly believe that this journal will reflect the maxims of research going on in the university. We are proud to record the research going on in our university in this journal. The success of any journal is built primarily on four groups of people: the contributors, the reviewers, the associate editors, and the publications staff. I would like to thank all of them and express my sincere appreciation for the support they have given to our International Journal of Engineering & Extended Technologies Research. I am sure that this journal will grow leaps and bounds in terms of its contribution in research on an international platform.

My heartiest congratulations for the publication of this journal of international repute!

Dr. Rajeev Kumar
Chairman,
Kalinga University
